Technical Skills

Programming Languages:

C++, Java, Python, JavaScript, Swift, Kotlin, SQL

Web Technologies & Frameworks:

HTML, CSS, React, Next.js

Cloud & Deployment :

AWS, Vercel

Tools & Platforms :

Clerk, Cisco Packet Tracer, Kaggle

CAD & Engineering Tools:

SolidWorks

Soft skills :

Problem solving, Team collaboration, communication, adaptability

Projects

Credit Card Recommendation System

Duration : Apr 2024 - Jan 2025

Built a system that analyzes user financial data (income, spending categories, credit score).

Recommended suitable credit cards based on rewards, cashback, and benefits.

Applied machine learning / rule-based algorithms to improve decision accuracy.

Legal Advise and Lawyer Recommendation System

Duration : Feb 2025 - June 2025

Developed a legal assistance platform that provides instant answers to legal queries.

Enabled users to generate documents such as contracts and agreements.

Improved accessibility to legal support through AI-based assistance.

AI Resume Analyser

Duration : Aug 2025 - Dec 2025

Developed an AI-powered application that analyzes resumes, evaluates ATS compatibility, identifies missing keywords, and provides personalized recommendations to improve resume quality. The system helps users optimize their resumes for better job application success through intelligent feedback and skill-based analysis.
